

THE FIRE MIX! BY RADHIKA SETH / 11/11/2011

The Fire Formula is a cool fire extinguisher where the chemicals can be mixed together on location in a jiffy. Apparently you can choose the amount of water and carbon dioxide combo that you require and douse the flame. However I like it more for its designer appeal. It looks way better than the traditional extinguishers and borders on being classy!

Designers: Sheng-Hung Lee & Chen-Hua Wang
